

# Our service...

## Design

Everyone has their own idea of what will make their home perfect. Our experts will draw on their knowledge and years of experience to bring your dreams to life.

Think about the conservatory design you would like then talk to us about your ideas. Draw up some rough measurements on the grid provided or take a photograph of the site to bring to our showroom or show to our visiting estimator.

One of our expert surveyors will visit your home to take detailed measurements and confirm the design, position of doors and opening windows. We'll even try to match the bricks to your existing ones.

If desired, we can offer you the option of a planning service, and will draw up your plans on a computer, illustrating how your conservatory will look from every angle.

## Roof options

At Windows Plus we offer some of the most advanced roofing options for our full range of custom-designed conservatories. We fit the latest heat-guarded polycarbonate roofs as standard, or you can choose self-cleaning glass that's solar-controlled for your bespoke build.

A polycarbonate roof blocks up to 80% of the sun's solar energy from entering the conservatory, helping to maintain a comfortable temperature in summer and, in winter, a large proportion of rising heat is radiated back into the room,

Available in clear, blue or green tints, the special coating on the outside of our self-cleaning glass is activated by UV light, breaking down dirt and allowing raindrops to wash it away.

Solar-controlled glass is treated on the inside to reflect unwanted summer rays from entering your conservatory in summer and reduce heat loss and reflect it back into your room in winter.

## Grand designs

No matter what you have in mind, talk to us. If you can find it, we can do it... and the chances are, we already have.

## Our builds

We'll take care of everything, including digging the foundations, forming the base, building walls, erecting the frames and roof, and fitting the glass.

We'll plaster the internal walls, lay the floor with ceramic tiles or flooring of your choice from our range of high-grade laminates, and also install the electric sockets and lighting. We pride ourselves on cleaning up and leaving your home spotless once the project is finished.

Our insulated bases are built on a solid concrete slab topped with a highly efficient damp-proof membrane that stops moisture from below; or a joist-based wooden floor where needed.

Manufactured to the highest standard from virgin quality uPVC, our frames feature the latest security and locking systems fitted as standard, with internal double glazing to prevent the glass being removed from the outside.

The thermal properties of our A-rated toughened glass units in the sides and roof help keep your conservatory warm in winter and cool in summer.

## Why choose us?

Designed especially to suit your property and needs, a conservatory from Windows Plus will transform your house into the home you've dreamed of.

Our bespoke service means you don't need to move to create extra living space, whether you want an extra room for working, relaxing or entertaining.

Our fully qualified and accredited experts take the time to work with you to create your perfect conservatory, helping you choose and build the structure that's ideally suited to the unique requirements of your property and lifestyle.

We're so confident of the quality of our work, we give a unique lifetime warranty on parts and labour. Plus, our dedicated service department guarantees you'll receive exceptional aftercare.

What's more, we won't ask for any money up front. You'll see the quality and build of the finished conservatory before you're asked to pay a penny.

## Standard Choices...

### Lean-to

Lean-to conservatories have a single slope for a roof, creating a continental sunroom-style addition to your home. They're perfect for properties where the available space is an awkward shape or for narrow areas. All our conservatories, are built to suit your property, so we'll work with you to ensure the perfect design for your home.

### Victorian

A bay-fronted conservatory with a ridge central in the roof. Victorian conservatories are perfect for larger properties where losing spacing inside the new room isn't an issue for you; or for meeting planning restrictions from builds that are close to neighbouring properties. Choose from a three or five-faceted front to create the classic rounded Victorian shape.

### Edwardian

Sometimes known as Georgian, these conservatories are square-fronted with a central ridge in the roof. Simple, timeless and elegant, Edwardian conservatories are light and airy, so choose this style for the spacious feel created by the elevated roof. They also provide more internal space than a Victorian owing to their squared-off shape.

### Double-hipped

This is the perfect conservatory to complement your bungalow or any single storey extension. The pitched roof slopes upwards from the sides giving a clean look and straight, simple lines. This style also maximises internal floor space. It will accommodate any height restrictions and can be built wider than an Edwardian, but with the same elegant look and feel.

## Bespoke Builds...

No matter what size, shape or style your home and garden are, our bespoke service means we'll work with you to tailor-make the perfect solution for your home

### Orangeries

A Windows Plus Orangerie will give your home the appearance of an extension with the light feel of a conservatory. They feature more brickwork than a conservatory so they blend into your home, but large windows retain the airy conservatory look and feel. Why not choose a roof with a ceiling perimeter that gives you the option to install atmospheric lighting? We can also design your orangerie so it's made of 75% translucent materials and doesn't need planning permission.

### Lanterns

As with our conservatories and orangeries, Windows Plus roof lanterns are bespoke designed and built. The most popular roof lantern formats are based on square or rectangular apertures, but circular, octagonal and lozenge derivatives are all possible, too, as are raised lanterns.
